

MANOJ ADHIKARI

adhikarim@etsu.edu | manojadhikary.com.np | LinkedIn | Github

Professional Summary

Experienced data engineer/analyst with 3+ years of industry expertise in data systems. Proficient in data analytics, visualization, business intelligence, machine learning, and natural language processing, with a strong ability to design and develop data-driven intelligent systems.

Skills

Python, R, C#, Java, MongoDB, SQL, PostgreSQL, Django REST Framework, Flask, FastAPI, Streamlit, Postman, Pandas, Scikit-Learn, Apache Airflow, Scrappy, Pytorch, BeautifulSoup, Git, HTML, CSS, PowerBI, Matplotlib, Tableau, AWS QuickSight, Linux, Windows, AWS EC2, GCP, Microsoft Office Suite, Agile, Software Project Management, Machine Learning, Business Intelligence, RPA, NLP, GenAI, RAG, and Research.

Education

Master of Science in Computer Science (GPA: 4.0)

East Tennessee State University

Aug 2023 - May 2025

Johnson City, Tennessee

Bachelor of Science in Computer Science and IT (GPA: 3.68)

St. Xavier's College: Tribhuvan University

Aug 2016 - May 2020

Maitighar, Kathmandu

Professional Experience

Graduate Teaching Assistant, Department of Computing (Part Time)

East Tennessee State University

Sep 2023 – Present

Johnson City, Tennessee

- Facilitated classes for over 200 students on IT topics, including Digital Literacy and Cybersecurity.
- Supervised lab projects and guided practical skill development.
- Mentored new teaching assistants on course management and teaching strategies.

Data Analyst

Renegade Insurance

Feb 2022 – July 2023

Atlanta, Georgia

- Conducted data analysis on quotes, coverages, and premiums, resulting in an 18% revenue increase.
- Performed pattern mining, boosting lead generation by 15%.
- Developed ETL pipelines for seamless data integration, cutting operational costs by 20%.

Python Developer

BitsKraft

Jan 2020 – Feb 2022

Naxal, Kathmandu

- Developed a data portal and phishing simulation system, reducing costs by 25%.
- Enhanced system security with multi-factor authentication and dark web exploit search features, improving security by 40%.

Publications

- Assessment of Criminal Activities in Kathmandu Valley using KNN Classifier. Co-author, Research Annals of Xavier's Nepal, ISSN: 2705-456X, Issue: 2.0, 2021. | Fr. Locke and Stiller Research Awardee - Cycle II (2019)
- A Study on Driver Drowsiness Detection Using CNN Models and Behavioral Indicators of Fatigue: Eye Movements, Yawning, and Head Pose. (Submission: MDPI, under review)

Projects

- BucBuddy:** RAG architecture-based conversational chatbot for ETSU scholars, providing precise query answers through vector retrieval and LLM response measures.
- Network Intrusion Detection System:** Achieved 98% accuracy in detecting network breaches through neural network models.

Professional Development

Data Science Web App (Streamlit and Python) | Federated Learning with Azure Machine Learning | Data Engineering Foundations | Statistics Foundations | Social-Behavioral-Educational Researchers | Working with BigQuery | Students in Research CITI Program | Data Science for Business | Introduction to Power-BI | Getting Started with Data Analytics on AWS | Supervised Learning with Scikit-Learn textbar Unsupervised Learning in Python | Google Crowdssource Certificate of Excellence

Extra-Curricular Activities

Vice President, Cricketer's Club of ETSU

March 2024 – Present
